CTEK ANNOUNCED AS WINNER IN MOTORRAD BATTERY CHARGER TEST

CT5 POWERSPORT charger bags the top spot

CTEK, a leading global brand in the care and maintenance of vehicle batteries, is celebrating after being awarded the coveted Motorrad TESTsieger with the CT5 POWERSPORT charger, beating off competition from brands including Optimate, Gys & Procharger, to bag the top spot.

The Motorrad test, undertaken by independent testing organisation GTÜ, compared 15 different chargers and involved many different test stages. Each test stage involved chargers being scored points and the charger with the most points overall was the 'TESTsieger'. The CT5 POWERSPORT charger scored 453 out of a possible 500 points, winning the test.

"Winning this test a real reflection of our continuous commitment to quality, safety and reliability...we are delighted to beat off so many competitors."

Christian Fritz, Sales Manager Germany

He continued "For motorcycle owners battery charging forms a key part of vehicle maintenance, especially when they are stored away for long periods of time over the winter. We are really pleased that this test has highlighted the quality of our charge and overall approach to battery maintenance."

The CTEK CT5 POWERSPORT charges, conditions and maintains all types of 12V lead-acid powersport batteries including maintenance free types and all chemistries including Calcium, GEL & AGM. As with all CTEK products, the CT5 POWERSPORT is fully

automatic, foolproof to connect, spark proof and reverse-polarity protected, for user safety and comes with a free 5 year manufacturers warranty.
